

INSULATION MACHINE CORP

AccuVac 8

Insulation Removal Vacuum

Powerful Performance in a Managable 8 HP Package

Want to make short work of messy, time-consuming insulation removal jobs? The AccuVac 8 insulation removal vacuum is designed for fast, profitable removal of fire, smoke and water damaged insulation from attics, sidewalls and crawl spaces.

Features

- Recoil start
- 8 HP Briggs & Stratton motor
- Cellulose processing capacity of 2028 cu. ft/hr., 2819 lbs/hr.
- Fiberglass processing capacity of 2925 cu. ft/hr., 2100 lbs./hr
- Weight: 125 lbs
- 1 year warranty

Handle Bulky Insulation Materials Efficiently & Productively

Blown-in insulation and plaster chips - wet or dry - are removed quickly and efficiently. Material intended for recycling can be conveyed directly to your spraying machine for reuse. Waste material can be discharged directly into 75 cubic foot disposable collection bags or directly into a trash receptacle.
